Interface / range of functions		... ET
Configuration from Motion Manager 6.0		RS232
Fieldbus		EtherCAT
Operating modes		PP, PV, PT, CSP, CSV, CST and homing acc. to IEC 61800-7-201 or IEC 61800-7-301 as well as position-, speed- and torque control via analog setpoint or voltage controller
Speed range		see motor diagram
Application programs		Max. 8 application programs (BASIC), one of which is an autostart function
Additional functions		Touch-probe input, connection of a second incremental encoder, control of a holding brake
Indicator		LEDs for displaying the operating state Trace as recorder (scope function) or logger

### Note:

The display shows the range of possible operation points of the drives at a given ambient temperature of 22°C.

The diagram indicates the recommended speed in relation to the available torque at the output shaft.

It includes the assembly on a plastic- as well as on a metal flange (assembly method: IM B 5).

The nominal voltage linear slope describes the maximal achievable operating points at nominal voltage. Any points of operation above this linear slope will require a supply voltage  $U_{mot} > U_N$ .
